

Example on styling

```
<template>

    <div style="background-color:#16325c;padding:0.5rem">

        <button class="slds-button slds-button_inverse">Inverse
Button</button>

    </div>

    <div class="slds-box">

        <P style="color:blue;text-align:center;">

            This is my paragraph

        </P>

    </div>

    <img src={imgr}>

    <div class="idstyle1">

        This is my Id style

    </div>

</template>
```

CSSFILE

```
.outrfirstclass {
    color: brown;
    background-color: bisque;
    font-size: larger;
    font-family: 'Courier New', Courier, monospace;
}

.idstyle1
{
    text-shadow: 0ch;
```

```

        font-style: italic;

        background-color: aqua;

    }

```

JSFILE

```

import { LightningElement } from 'lwc';
import logging from '@salesforce/resourceUrl/logo';

export default class Csscomp extends LightningElement {
    imgr=logging;
}

```

Example on Simple way to upload image through Static Resource

```

import { LightningElement } from 'lwc';
import logging from '@salesforce/resourceUrl/logo';

export default class Csscomp extends LightningElement {
    imgr=logging;
}

<template>

    <div style="background-color:#16325c;padding:0.5rem">

        <button class="slds-button slds-button_inverse">Inverse
Button</button>

    </div>

```

```

<div class="slds-box">
  <P style="color:blue;text-align:center;">
    This is my paragraph

  </P>
</div>

<img src={imgr}>
<img src={imgpic1}>
<div class="idstyle1">
  This is my Id style
</div>

</template>

```

To upload more than one image use this code

```

import { LightningElement } from 'lwc';
import logging from '@salesforce/resourceUrl/logo';
import Allresources from '@salesforce/resourceUrl/Imagefolder';

export default class Csscomp extends LightningElement {
  imgr=logging;
  imgpic1=Allresources + '/staticResources/images/laptop.jfif';
}

<template>

  <div style="background-color:#16325c;padding:0.5rem">
    <button class="slds-button slds-button_inverse">Inverse
    Button</button>
  </div>

```

```

<div class="slds-box">
  <P style="color:blue;text-align:center;">
    This is my paragraph

  </P>
</div>

<img src={imgr}>
<img src={imgpic1}>
<div class="ldstyle1">
  This is my ldstyle
</div>

</template>

```

Example on Custom Label

```

import { LightningElement } from 'lwc';
import newmsg from '@salesforce/label/c.Mymsg1';

export default class Csscomp extends LightningElement {
  greetings=newmsg;
}

```

```

<template>
<div class="slds-box">
  Show my custom Label:{greetings}
</div>

```

</template>

Example on user Id

How to show current user id in lwc

```
import { LightningElement } from 'lwc';
import myuserid from '@salesforce/user/Id';
export default class Acessusercomp extends LightningElement {

    userid=myuserid;
}
<template>
    <div class="slds-boc">
<h1 style="color:brown; background-color:blanchedalmond;">
User id of a :{userid}
</h1>

    </div>
</template>
```
